

MCITP

PROGRAM DETAILS

Program Description

The MCITP is designed for IT professionals who want to demonstrate their in-depth knowledge and technical skills of key Windows Server 2008 technologies: Active Directory Configuration, Network Infrastructure Configuration, and/or Applications Infrastructure Configuration.

The Microsoft Certified IT Professional (MCITP) Program's objective is to have students gain expertise in designing and implementing the infrastructure for business solutions based on the Windows platforms, and Microsoft Windows Server Systems. By earning the MCITP credential, individuals are demonstrating that they have the skills necessary to lead organizations in the successful design, implementation, and administration of the most advanced Windows operating system and Microsoft Windows Server System. Upon successful completion of this vocational technology program, students have the necessary skills to continue their career objectives within their working fields, specifically in IT related careers.

Program Objectives

The Microsoft Certified IT Professional (MCITP) Program is designed for the attainment of the premier certification for professionals who analyze the business requirements and design and implement the infrastructure for business solutions based on the Microsoft Windows 2008 platform and Microsoft Windows Server System. Implementation responsibilities include installing, configuring, and troubleshooting network systems.
